

Ing. Jindřich Třaskoř

Ostrava, Prague | +420 725 434 991 | jindratraskos@gmail.com

Profile

Game developer and software engineer with a strong background in Unity, C#, robotics, and interactive applications. Experienced in developing complete games and gameplay systems, as well as UI, progression, save systems, backend architecture, and client-server communication.

I enjoy building technically challenging systems and turning them into engaging interactive experiences. My background in robotics provides additional experience with real-time systems, software architecture, VR, and simulation.

Game Development Experience

INDEPENDENT GAME DEVELOPER | PERSONAL PROJECTS | 2020 - PRESENT

PORTFOLIO - [LINK](#)

- Develop games and interactive applications using Unity and C#.
- Build gameplay systems, UI, progression, save systems, and game logic.
- Develop Axiom Prime, an online idle-style game with a Unity client, custom backend, and client-server communication.
- Created Factory Collapse, a complete rhythm-based game in one week for a game jam.
- Developed VR applications and interactive environments using Unity for robotics and human-machine interaction.

Professional Experience

SOFTWARE DEVELOPER | A3SOFT | 2022 - 2023

- Developed backend software for payment terminals and embedded systems.
- Implemented communication between peripherals and a custom hardware platform using an STM32-based MCU.
- Worked with C/C++ and low-level communication interfaces in a production software environment.

Education

PH.D. | CTU FEE | 2025 - PRESENT

- Research focus: Virtual reality - Human Swarm Interface

ING. | VSB-TUO | 2023 - 2025

- Major: Robotics
- Specialization: Service Robotics
- Master's Thesis: Use of Virtual Reality in Mobile Robotics

BC. | VSB-TUO | 2020 - 2023

- Major: Mechanical Engineering
- Specialization: Robotics

- Bachelor's Thesis: Simulation of Mobile Robot on a Trajectory with Obstacles

STŘEDNÍ PRŮMYSLOVÁ ŠKOLA OSTRAVA – VÍTKOVICE | 2016 – 2020

- Major: Mechanical Engineering – Computer Technology

Skills and Competencies

- | | | |
|-------------------|-------------------|-----------------------|
| ✓ Teamwork | ✓ Programming | ✓ Game development |
| ✓ Public speaking | ✓ Virtual reality | ✓ Systematic thinking |

Technical Skills

GAME DEVELOPMENT

- Unity
- Gameplay Programming
- Game Systems
- UI Development
- VR / Interactive Applications

PROGRAM. LANGUAGES

- C#
- Python
- C, C++

SOFTWARE & BACKEND

- ASP.NET
- Client-Server Communication
- Git
- Coppeliasim

ROBOTICS

- CAD: Creo, Inventor
- Office
- STM32 – CubeIDE
- Raspberry/Jetson/Arduino
- PX4 / MAVSDK

Certificates

THE FIRST INTERNATIONAL COMPETITION ON RESEARCH AND DESIGN OF UAV | 2024

- Participated in an international competition at Ton Duc Thang University, Vietnam.
- Developed drone and peripheral software, including a positional control mode using the Intel RealSense T265.
- Led testing and troubleshooting of multiple UAV versions.

ROS FOR BEGINNERS I & II - UDEMY | 2022

C# UNITY GAME DEVELOPER 2D - UDEMY | 2020

Other Information

LANGUAGES

- English – B2
- Czech - Native
