

# JINDRICH TRASKOS

Software engineer | Unity / C# | Robotics

## PROFILE

Software engineer with a robotics background and experience in game development, simulations, VR interfaces and physical prototypes. Interested in software architecture and systems that are understandable, testable and useful.

## FOCUS

C# and Unity | Software architecture | Gameplay and tools  
C++ | Python | VR/XR | Robotics software | Simulation

## SELECTED PROJECTS

Factory Collapse - Unity/C# game jam project  
Axiom Prime - ship-building RPG systems and UI  
VR Teleoperation - human-swarm interface research  
VR Mobile Robotics - master thesis  
Mobile Robot Simulation - bachelor thesis  
Vietnam Competition - physical robotics project  
Robot Arm Manipulator - Arduino/C++ prototype

## EDUCATION

Robotics-focused university education  
Thesis work in simulation, VR teleoperation and human-swarm interaction
